

Department of Computer Science and Engineering

Course Code: CSE 370	Credits: 3.0
Course Name: Database Systems	

Lab Homework 4

You will use the Bank database that has been explained in Lab class You will find the data of the bank database from " **Lab Sheet 5**" given in bux [https://bux.bracu.ac.bd/courses/course-v1:buX+CSE370+2022_Summer/78d19deafc9346d89500b6e7a786b583/]

Using the bank database, write MySQL queries for the following tasks:

1. Find the name and loan number of all customers having a loan at the Downtown branch. [2]
2. Find all the possible pairs of customers who are from the same city. show in the format Customer1, Customer2, City. [2]
3. If the bank gives out 4% interest to all accounts, show the total interest across each branch. Print Branch_name, Total_Interest [1]
4. Find account numbers with the highest balances for each city in the database [1]
5. Show the loan number, loan amount, and name of customers who have the top 5 highest loan amounts. The data should be sorted by increasing amounts, then decreasing loan numbers in case of the same loan amount. [Hint for top 5 check the "limit" keyword in mysql] [2]
6. Find the names of customers with an account and also a loan at the Perryridge branch. [2]
7. Find the total loan amount of all customers having at least 2 loans from the bank. Show in format customer name, total_loan. [2]
